CYBER & TECH RISK ADVISORY SERVICES

**Technology drives business forward, yet unmanaged cybersecurity and technology risks can hinder operations. Do you know where your cybersecurity and technology exposure lies and how it is controlled?**

## **As a Leader, These Are Some Key Questions You Should Ask Yourself**

- |  |  |
|--|--|
| <ul style="list-style-type: none"><li>• Do we have a current, enterprise-wide view of our cyber and technology risks, and a clear, actionable roadmap to remediate them?</li><li>• Are our systems, processes, and vendors operating at a maturity level that meets today's federal and industry requirements?</li><li>• Have we identified where we fall short of key frameworks such as HIPAA, FFIEC, NYDFS-500, GDPR, CCPA, PCI-DSS, or NY SHIELD, and what those gaps mean for our business exposure?</li><li>• Is our risk governance automated, efficient, and providing real-time visibility to leadership, or are we still managing risk through spreadsheets?</li><li>• Are our cybersecurity and technology controls truly effective, or are we relying on assumptions that haven't been validated?</li><li>• Do we know which vendors could introduce operational or reputational risk, and how quickly we could detect and contain it?</li><li>• Does our technology department truly understand and stay current on the cybersecurity threats targeting our organization, and are they effectively prioritizing and addressing those threats?</li></ul> | <ul style="list-style-type: none"><li>• How can I get better visibility into the cybersecurity threats and risks impacting our business functions and operations?</li><li>• Do we fully understand what is happening with our networks, systems, applications, and third-party vendors?</li><li>• Do I receive concise, meaningful risk metrics that allow me to make informed board-level decisions, or am I getting data without insight?</li><li>• Can I confidently answer my board or investors and provide meaningful, data-driven reporting that demonstrates we have a strong understanding of our cybersecurity posture and technology risk?</li><li>• When, not if, a cyber incident occurs, how confident am I that our teams are prepared to respond, contain, and communicate effectively?</li><li>• Have our executives and employees been trained to recognize threats, or are human errors still our weakest security link?</li><li>• Do we have the right people, skills, and structure to manage our risk posture, or are key roles still unfilled or unclear?</li></ul> |
|--|--|

**If you do not have the answers to these questions or are not comfortable with them, you may want to consider contacting GuardianPoint for an initial consultative meeting.**

# GUARDIANPOINT

CYBER & TECH RISK ADVISORY SERVICES

## Our Mission Statement

At GuardianPoint, our mission is to stand beside you as trusted guardians in an unpredictable digital world. We help mid-sized organizations achieve cybersecurity maturity through practical, tailored, and regulatory-aligned strategies. We combine deep expertise in cyber, technology risk, third-party risk, threat management, incident and crisis preparedness, security awareness, and AI governance to safeguard your mission, protect your customers, and strengthen the trust that defines your brand. With GuardianPoint, you are never alone in the storm; you have a partner standing shoulder to shoulder with you, turning uncertainty into confidence and risk into resilience.

## Our Core Services

### Cybersecurity Risk Management

- Comprehensive Cyber Risk Assessments and remediation roadmaps
- Compliance Gap Assessments (HIPAA, FFIEC, NYDFS-500, GDPR, CCPA, PCI-DSS, NY SHIELD)
- Cyber Insurance Control Preparation and Readiness Assessments
- Governance, Risk & Compliance (GRC) program design and automation
- Cybersecurity and Technology Risk Control and Self-Assessment (RCSA), Control implementation and validation
- Audit and Regulatory readiness assessments, gap assessment, and remediation planning
- Vulnerability and Threat Management Process Engineering and Design
- Third-Party Risk Management program build-out and operationalization

### Strategic Advisory & Oversight

- Virtual CISO-Program Governance, assessment, roadmap, and Board reporting
- AI Governance, Strategy, and Risk Assessment
- Metrics, KRIs, and Executive Dashboards for leadership and board-level reporting
- Policies, Standards, and Procedures aligned with industry best practices and frameworks
- Incident and Crisis Response Assessment, Preparation, team coordination, Playbook creation, testing, and Tabletop Exercises
- Security Awareness Training for employees, executives, and board members
- Social Engineering (Phishing, Smishing, Vishing) assessments of human security risk
- Staff Augmentation for Cybersecurity and Technology Risk Management

## Why Choose GuardianPoint, LLC.

- Enterprise expertise applied to medium-sized businesses
- Practical, actionable strategies
- A partner in risk, standing beside you
